Minutes

Agenda item:	Look over project slides and making sure all the work is cohesive.	Presenter:	Dennis Boguslavskiy
---------------------	--	-------------------	---------------------

Discussion:

We discussed how we should present the work to the class as well as what extra things we should add. We also read our parts to each other so we all understand what each person will be talking about. We spoke about how we should present ourselves in front of the class in terms of positioning and who will have a script and who will not. We then practiced briefly about what we were gonna say.

Conclusions:

We ended the meeting with another meeting planned for Tuesday and feeling good about the progress we made in the presentation. We also planned on being one of the first ones to present so that way we can get it out of the way.
